

Primary applications:
Light Sheet Microscopy
Multi-Color Fluorescence
High Content Screening
Tiling Applications

```
| 9 Megapixel (2960 x 2960)
* 17.8mm Field of View
* 4.25\mum x 4.25\mum Pixel Area
* 30 Frames per Second
D 73% Quantum Efficiency
```

## IRIS 9 <br> 

## Large Field of View Scientific CMOS

Iris 9 Scientific CMOS camera is designed to deliver extremely high-resolution images for live cell microscopy applications. Iris 9 delivers a 9 Megapixel sensor with a 17.8 mm field of view ensuring it can maximize the number of cells captured in a single frame.

The $4.25 \mu \mathrm{~m}$ pixels provide highly detailed images across the imaging plane and allow for Nyquist spatial sampling at 40X magnification. The camera can capture dynamic cellular events at 30 frames per second for the full frame, and at thousands of frames per second with regions.

The Iris 9 has a high quantum efficiency and low noise levels to maximize dim signal detection and allowing for the use of shorter exposure times to minimize cellular photo-damage.

The Iris 9 is the ideal camera to deliver high resolution images at high frame rates for live-cell microscopy applications.

| Features | Advantages |
| :--- | :--- |
| 9 Megapixel Sensor <br> 17.8 mm Field of View | Maximize the imaging area and increase the number of cells acquired per frame |
| Optimized $4.25 \mu \mathrm{~m}$ Pixel Size | Image the finer details of your samples and maintain proper spatial sampling at 40X magnification |
| Fast Frame Rates | Mapture dynamic cellular events with high temporal resolution |
| High Quantum Efficiency | Maximize ability to detect extremely faint fluorescence signals |
| Low Read Noise | Measure both bright and dim signal levels within the same image |
| Large Dynamic Range |  |

| Specifications | Camera Performance |
| :---: | :---: |
| Sensor | GPixel GSense 5130 Scientific CMOS sensor |
| Active Array Size | $2960 \times 2960$ (9 Megapixel) |
| Pixel Area | $4.25 \mu \mathrm{~m} \times 4.25 \mu \mathrm{~m}\left(18.06 \mu \mathrm{~m}^{2}\right)$ |
| Sensor Area | $12.61 \mathrm{~mm} \times 12.61 \mathrm{~mm}$ <br> 17.8 mm diagonal |
| Peak QE\% | >73\% |
| Read Noise | 1.5e- |
| Full-Well Capacity | 13,000e- |
| Bit Depth | 16-bit |
| Readout Mode | Rolling Shutter <br> Effective Global Shutter |
| Binning | $2 \times 2$ (on FPGA) |

| Cooling Performance | Sensor Temperature | Dark Current |
| :--- | :--- | :--- |
| Air Cooled | $0^{\circ} \mathrm{C} @ 30^{\circ} \mathrm{C}$ Ambient | $0.5 \mathrm{e}-/$ pixel/second |

| Specifications | Camera Interface |
| :--- | :--- |
| Digital Interface | PCle |
| Lens Interface | C-Mount |
| Mounting Points | $1 / 420^{\prime \prime}$ mounting point on each side |

| Triggering Mode | Function |
| :--- | :--- |
| Input Trigger Modes | Trigger-First: Sequence triggered on first rising edge <br> Edge: Each frame triggered on rising edge |
| Output Trigger Modes | Any Row: Expose signal is high while any row is acquiring data <br> All Rows: Effective Global Shutter - Expose signal is high when all rows are acquiring data <br> Signal is high for set Exposure time |
| Rolling Shutter: Effective Global Shutter - Expose signal is high when all rows are acquiring data |  |
| Signal is High for set Exposure time - Readout Time |  |

| Frame Rate (PCle interface) |  |  |  |
| :---: | :---: | :---: | :---: |
| Array Size | 16-bit |  |  |
| $2960 \times 2960$ | 30 |  |  |
| $2960 \times 1500$ | 59 |  |  |
| $2960 \times 512$ | 174 |  |  |
| $2960 \times 128$ | 695 |  |  |
| Accessories (Included) |  |  |  |
| Manual |  |  |  |
| Prigger Cable Card/Cable <br> Power Supply |  |  |  |
